EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

a) please cancel claims 13-19;

2. The following is an examiner's statement of reasons for allowance:

The Woods reference discloses a method of operating an integrated power module that generates an anode exhaust gas including combustible components comprising: receiving the anode exhaust gas from the fuel cell "118" at an elevated temperature; quenching the temperature of the anode exhaust gas by transferring heat from the anode exhaust gas to the inlet air "112" before the cathode exhaust gas (air) is added to the anode exhaust gas, wherein a flexible heat transfer barrier wall "126" exchanges heat between the anode exhaust gas and the inlet air to form a cooled anode exhaust gas; adding cathode exhaust gas (air) to the cooled anode exhaust gas to form an oxidizable anode gas mixture inside the combustor "120"; catalytically oxidizing the oxidizable anode gas mixture to form an effluent; and heating the effluent by adding additional air and fuel to the combustor to generate additional heat. The

Haltiner reference discloses a step of flowing the effluent "115" from the afterburner "66" to a manifold surrounding stack "44" and "46" (See paragraph [0039]).

However, Woods as modified by Haltiner does not expressly teach a step of adding ambient air to the anode gas to form an oxidizable anode gas mixture.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
